## Objectives for the Week

\*

*(What did you plan to achieve this week?)*

Find and run code to get facial tracking dots on a face.

## Accomplishments

\*

*(List the tasks you've completed and the milestones you've reached this week.)*

Found code that allows for facial tracking dots to be placed on a face.

## Challenges and Obstacles

\*

*(Describe any challenges or obstacles you faced this week and how you addressed them.)*

To many instances of Python are installed on my machine so dlib is getting confused when its trying to install

**Resources Used** \*

*(List any significant resources, such as articles, tools, libraries, or consultations.)*

Dlib official website code: [http://dlib.net/face\\_landmark\\_detection.py.html](http://dlib.net/face_landmark_detection.py.html)

**Next Week's Objectives** \*

*(List the goals you have set for the upcoming week.)*

Nuclear Option. Probably going to clear all accounts off my laptop and factory reset and take my time reinstalling python (and java). Run the previously found code.

**Feedback Required**

*(Is there anything specific you'd like feedback on?)*

Your answer

**Additional Notes/Comments**

*(Any other information you think is important to share about your progress, insights, or adjustments to your project plan.)*

I understand that it would probably be more efficient time wise to just look for the instances of Python on my laptop but I'd rather destroy everything than search for a three potential needles in a haystack, even with a needle finding magnet.

A copy of your responses will be emailed to [nkungad24@asmsa.org](mailto:nkungad24@asmsa.org).
